

45 Ranch

Location: SW Idaho, Owyhee River Canyon.
Approximately 100 miles SSW of KEUL

Coordinates:

WGS84	42.17243	-116.875084
D/M/S	42 10 20	116 52 30
GPS	42 10.346	116 52.505

Radio: 122.9

ELEVATION: 4300'

RUNWAY: 17/35

LENGTH: 2700' x 60'

SURFACE: TURF

CALM WIND RUNWAY: 35

Land to the north to provide safest go-around.

Suggested Approach:

- A. Descend into the canyon. Fly along and make a left turn onto short final
- B. Come over the ridge flying north, then sharp descent on final approach

Look out for other aircraft and sprinklers on the runway

Landing at the 45 Ranch is at your own risk. The airstrip is 2,700' long by 60' wide at a field elevation of 4,300' with terrain obstructions at each end of the runway. Pilots should be experienced and proficient in both mountain/canyon flying and high density altitude operations. Do not land if there are sprinklers in operation on the runway, there is an alternate BLM strip approximately 2 mile east. The location is remote and there is no fuel available at the 45 Ranch, so please plan accordingly.
